

CAVEMAN COLLECTIBLES

Fossil, Gem and Mineral Show

Saturday, March 31, 2012 9-3

Sunday, April 1, 2012 8-2

Morgan Hill Grange 40 E. 4th St. Morgan Hill, Ca

Caveman Collectibles is proud to present fossils and other specimens from a sizable private collection for purchase. Primarily self-collected over a span of 40+ years, the collection includes fossils from locations spanning the globe with a concentration on US sourced material. A broad range of fossil types will be offered, varying in value, type and number. Our show brochure highlights several choice specimens but is not all inclusive. We hope you are able to take this opportunity to initiate or expand your collection.

Rick Kennedy of Earth's Treasures will have many high quality specimen minerals available. Among the many minerals are specimens of the California state gem, Benitoite, a specialty of Earth's Treasures, which has a very distinctive blue color.
